Skills Summary

Core & Foundational Skills Critical thinking, problem-solving, data analytics, customer support, technical troubleshooting, AI-assisted programming, and English teaching/training.

Technical & Systems Skills

Experience across multiple operating systems including macOS, Windows, Linux (Mint, Ubuntu, Kali), iOS, and Android.

Hands-on work with virtualization and infrastructure tools such as Proxmox, virtual machines, and LXC containers, including building and maintaining a personal homelab environment.

Strong troubleshooting ability across system performance, connectivity, access control, configuration issues, and cross-platform environments.

Version control experience using Git, including branching, merging, and collaborative workflows.

Data Analysis & Modeling Data cleaning, data modeling, exploratory data analysis (EDA), data visualization, and ETL (Extract, Transform, Load) processes.

Programming & Scripting Python (NumPy, Pandas, Matplotlib), R Programming, SQL, Excel VBA, Java, JavaScript, HTML, CSS, React, Django, Bootstrap, and Tailwind.

Tools & Platforms

Tableau, Power BI, R Studio, Oracle SQL Developer, Microsoft SSMS, Microsoft Visual Studio, SQL Server Integration Services (SSIS), GitHub, Jira, Anaconda, JupyterLab, IntelliJ IDEA, Domo, Canva, Draw.io, Microsoft 365 Ecosystem, Autodesk Maya 2025, Trello,

Technical Support & Systems Experience

- Troubleshooting across macOS, Windows, Linux (Mint, Ubuntu, Kali), iOS, and Android
- Installation and configuration of Linux distributions (Mint, Ubuntu, Kali Linux)
- Built and maintained a Proxmox homelab server (LXC containers and virtual machines)
- Deployed services such as network file sharing (LXC) and Jellyfin media server (VM)
- Diagnosed issues involving networking, permissions, system performance, and service availability
- Performed hardware upgrades (ThinkPad T420 motherboard, RAM, storage)
- Used AI tools (e.g., ChatGPT) for troubleshooting, research, and validation
- Cross-platform debugging including browser and system compatibility issues
- Version control workflows using Git

Work Experience

Data Engineer

Concentrix (Remote)

Nov 2022 – March 2026 (3 years 4 months)

- Designed and implemented systems to collect data from databases, APIs, and data streams
- Transformed and cleaned raw data to ensure accuracy, consistency, and usability
- Built and maintained data pipelines to ensure reliable and efficient data flow
- Investigated and resolved data and system-related issues, ensuring reliability and performance
- Implemented data validation and contributed to governance and security compliance
- Collaborated with stakeholders to align technical solutions with business requirements

Sr Trainer I (Financial Account-North American Region)

Concentrix (Onsite)

Feb 2019 - Nov 2022 (3 years 9 months)

- Delivered Customer Experience Training (CET) and product training for new hires
- Supported trainees during nesting by providing real-time coaching, feedback sessions, and performance guidance
- Conducted troubleshooting assistance for trainees experiencing tool, login, and access-related issues
- Facilitated huddles to address QA concerns and improve call handling performance
- Created Excel-based tracking tools to monitor training completion and performance metrics
- Coordinated with multiple departments to resolve user access and system-related concerns

Education

Tech Career Program

Zuitt Co

Started April 2026 – Expected August 2026

BS IT Data Analytics

Mapua Malayan Digital College

Expected finish August 2028

Built projects related to EDA, Machine Learning, Data Mining, Database Design, Java, Python, Tableau, and Data Visualization

Bachelor of Secondary Education (Major in Chemistry)

Philippine Normal University

Graduated

Licenses and Certifications

Autodesk Maya 2025

Credential ID: AP703258098415025661205

Professional License for Teachers

Issued by Professional Regulation Commission

Project Experience

Capstone Project 1 — Personal Portfolio Website

Zuitt Tech Career Program

Description: Designed and developed a responsive personal portfolio website to demonstrate proficiency in front-end development, UI implementation, and structured web design principles. The project showcases selected works, technical skills, and developer background through a fully responsive multi-section layout.

Design & Development Process:

- Created initial layout direction and color exploration using Figma for early visual planning
- Used AI-assisted tools (Stitch and Claude AI) to generate typography guidelines, wireframe concepts, and layout suggestions
- Converted AI-generated wireframes into structured design mockups in Figma
- Developed final UI using HTML, CSS, Bootstrap, and custom responsive styling
- Implemented component-based layout structure (navbar, hero section, project cards, tools grid, contact form, footer)
- Integrated responsive design for mobile, tablet, and desktop views
- Applied custom design system using CSS variables for typography, spacing, and color tokens

Tech Stack: HTML5, CSS3, Bootstrap 5, Figma, Stitch, Claude AI, Git, GitHub Pages
